REAL ESTATE PROJECT

LUXEMBOURG

REF. 3311

SOLD

Like an open book, Le Cloître reveals its history to you.

In the heart of an area listed as a UNESCO heritage site, Le Cloître Saint-François boasts a unique geographic location offering exceptional views in all directions. Located on the old ramparts of the city on the site of the old Dominican bastion, facing the old fortress, the architectural jewel is inserted between the Corniche overlooking the magnificent Grund district and the Gastronomic Island neighboring the Palais Grand-Ducal and Place Guillaume.

Within it, while respecting and conserving historic elements, is a real residential complex promoting contemporary design. Unique in the center of the capital, these apartments suggest a delicate blend of high standing while enhancing the vestiges of the past. Stairs, beams, frames and windows have regained a second youth through the added light and refined finishes when the apartments have been equipped with superior quality services.

Each property is unique and offers the promise of unprecedented comfort.
